PROFESSIONAL SUMMARY

Results-driven and detail-oriented Computer Science student specializing in Software Engineering, Artificial Intelligence, and Full Stack Development. Skilled in building scalable applications, creating intelligent data-driven systems, and designing responsive web solutions using Python, React.js, Node.js, and TensorFlow. Passionate about leveraging technology to solve real-world problems and continuously learn emerging tools and frameworks.

EDUCATION

B.E. – Computer Science & Engineering (AI/ML) | Shri Shankaracharya Technical Campus, Bhilai (2022–2026)
| SPI : 9.25

Senior Secondary (XII – PCM) | Krishna Public School International, Naya Raipur (2020-2021) | 90.2%

TECHNICAL SKILLS

Languages: Python, C, C++, Java, JavaScript

Web Development: React.js, Node.js, Express.js, HTML, CSS, EJS, Bootstrap

Databases: MySQL, MongoDB

AI & ML: TensorFlow, scikit-learn, Pandas, NumPy, Model Training, Data Preprocessing

Tools & Frameworks: Cloudinary, JWT, bcrypt, Passport.js, Chart.js

Core Concepts: Data Structures & Algorithms, RESTful APIs, MVC Architecture, Geolocation Integration

PROJECTS

AI Interview Preparation App (MERN + Gemini AI) — Built an AI-powered interview assistant using Gemini AI for real-time question generation and feedback. Developed with React.js, Node.js, Express.js, and MongoDB. Integrated authentication, session tracking, and analytics for performance insights.

Wanderlust – Online Booking Platform (MERN Stack) — Developed a travel booking app using Node.js, Express.js, EJS, and MongoDB. Implemented geolocation, Cloudinary image handling, and Passport.js authentication for secure user sessions.

Zerodha-Inspired Trading Dashboard (Full Stack) — Created a real-time trading dashboard using React.js, Node.js, and MongoDB with Chart.js visualization and JWT-based authentication.

Music & Movie Recommendation System (MERN Stack) — Built a recommendation system with React.js, Express.js, and MongoDB. Implemented JWT authentication and responsive UI for user engagement.

EXPERIENCE

AI/ML Virtual Intern – AICTE & Google Developer | Apr 2024 – Jun 2024

Developed an object detection app using Android Studio and Flutter. Implemented ML models for real-time computer vision and image recognition tasks.

CERTIFICATIONS & ACHIEVEMENTS

- AI/ML Virtual Internship – AICTE & Google Developer (2024)
- Machine Learning Certification (2025)
- Web Development Course – Apna College (2025)
